MITESH KORADIA - 201801017

SHANTANU TYAGI - 201801015

SHUBHAM SHARMA - 201801058

# Work Done Till Now

## Brain Storming

In this part, we identified various functionalities, requirements, and technologies that can be used in order to implement our project successfully.

## Project Management

Developed a project workflow on JIRA, identified tasks distribution following agile development methodologies

## Technologies

Front End - React  
Back End - Node, Express  
Database - MongoDB  
Version Control - Git  
Deployment - AWS

## Design

We studied various design paradigms to come up with a friendly User Interface. We are using Figma for UI/UX

# Work Yet To Be Done

## Implementation

This consists of the coding part wherein all the functionalities will be implemented using the given technology stack and integrated with each other.

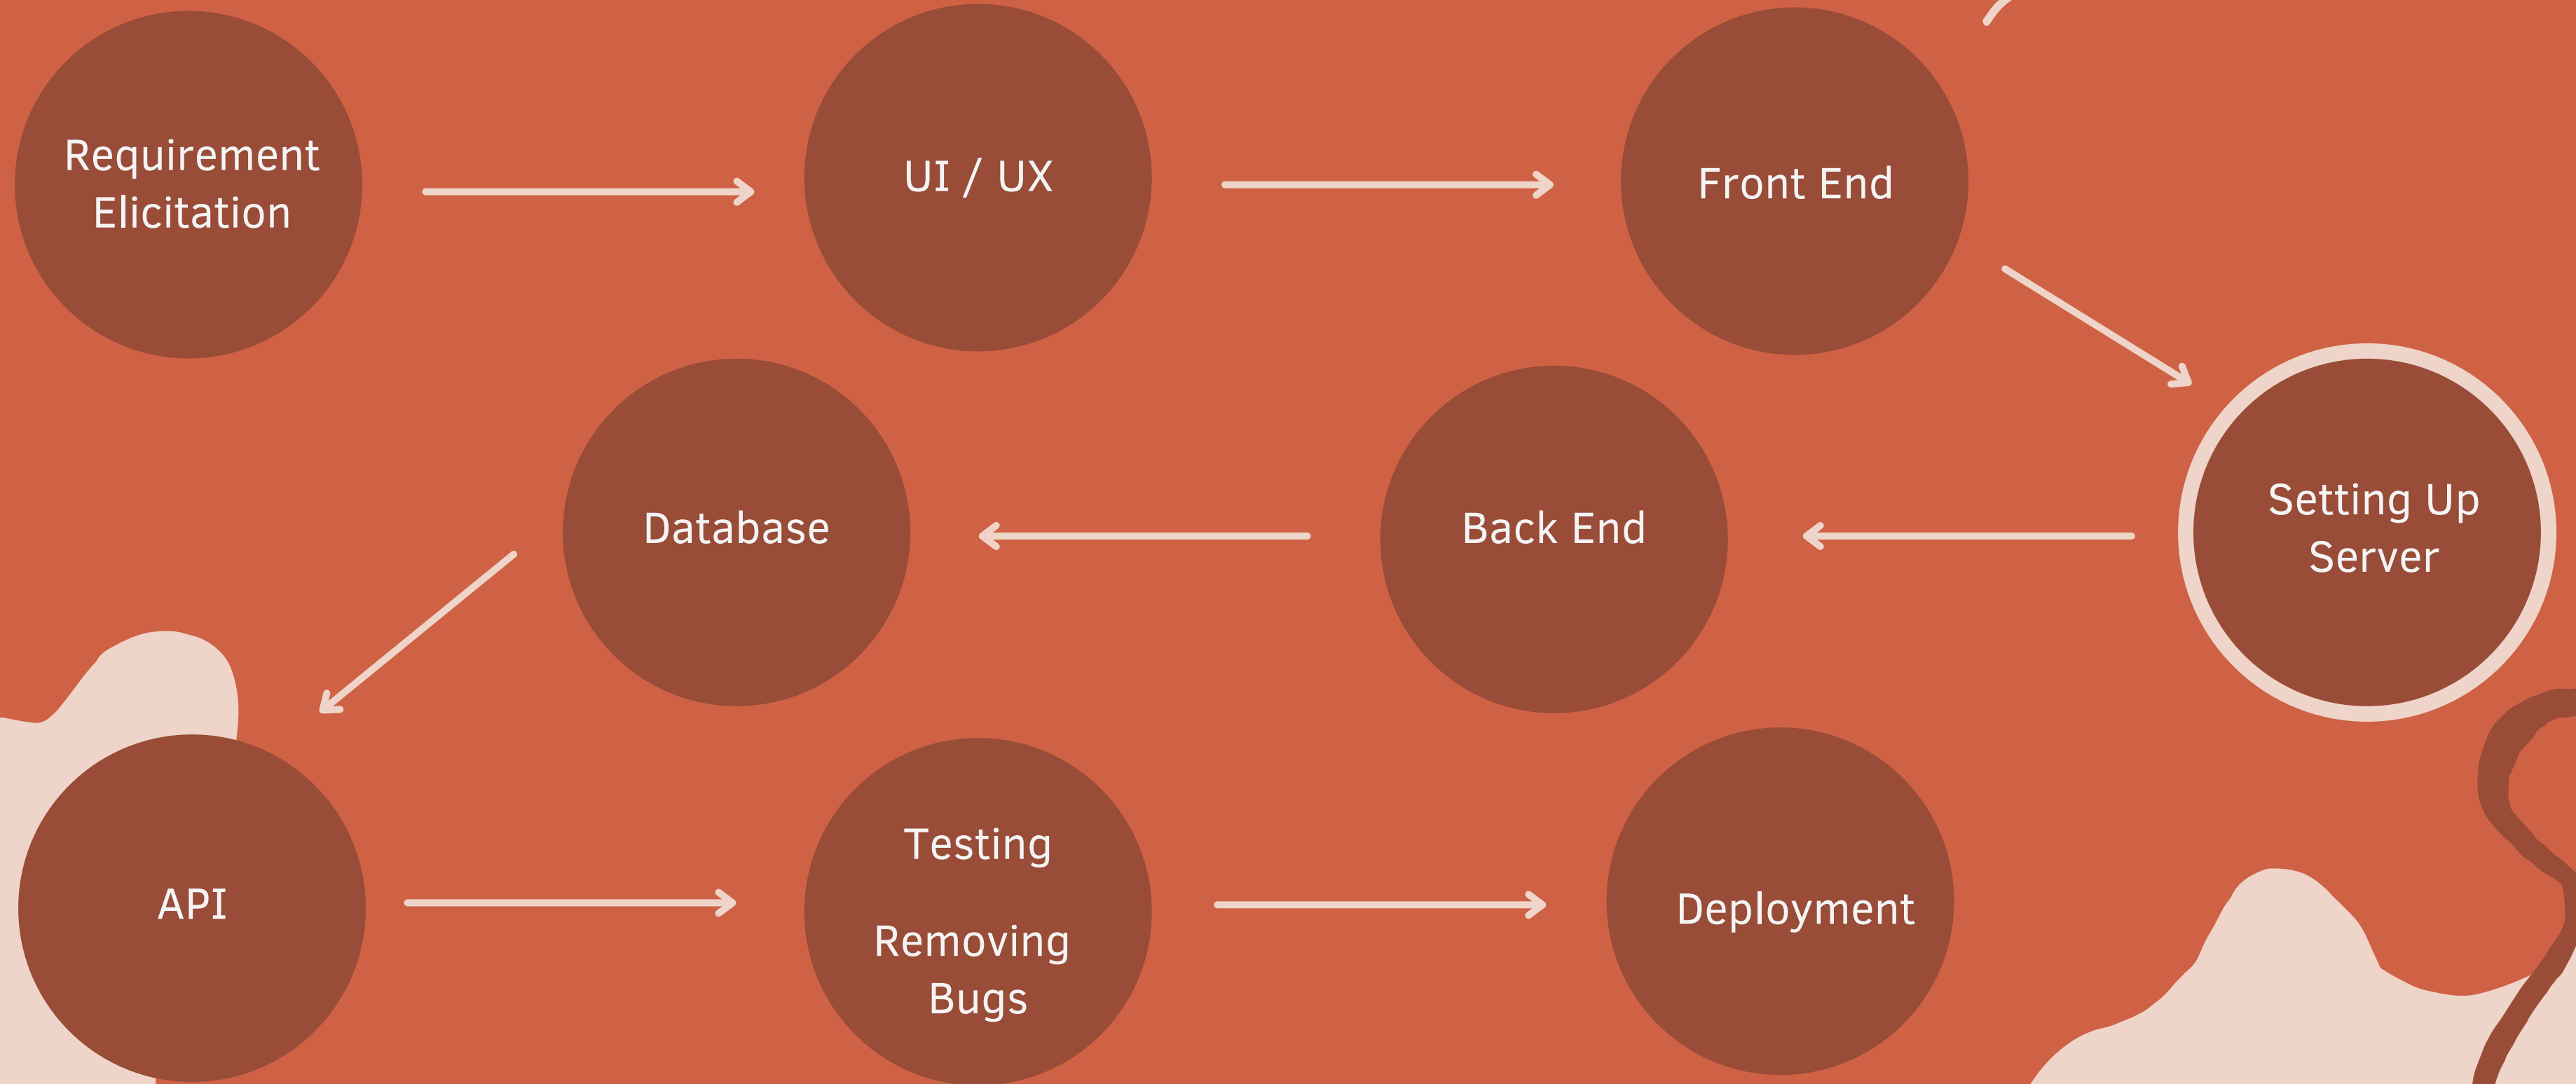

## Testing

This will include testing the server requests and responses, the database queries, and all the functionals are working and data is being correctly passed between pages.

## Deployment

This includes deployment of the website on the cloud and its maintainance.

# Project Plan

Thank You.
